

## Greater Atlanta

The Atlanta data center market represents the sixth largest data center region in North America. Atlanta also has the third largest concentration of Fortune 500 companies, many of whom are in the early innings of outsourcing their IT infrastructure. With a propensity of FinTech businesses, people have come to call this market 'Transaction Alley', as 70% of all electronic payments are processed here.

Atlanta is attracting large-scale development due to the favorable business climate, reasonable power cost, low natural disaster risk and available connectivity. As a result, Atlanta is becoming the Southeast Cloud Hub for several major hyperscale businesses.

## Bandwidth IG

Bandwidth IG provides mission critical data centers, hyperscalers and enterprises with high capacity, dark fiber throughout Northern California and Greater Atlanta. The company's new network is intentionally placed to ensure minimal overlap with other networks. The high-density cables allow Bandwidth IG to deliver diverse, low-latency, high-count fiber networks at a competitive value.

Bandwidth IG helps enterprises leverage the power of future digital advancements by delivering strategic dark fiber networks with the guidance of a professional, committed team of industry experts. The company maintains relentless focus on building and operating go-to dark fiber networks to support technological growth in all markets in which it operates.

With more major data center operators constructing new facilities in these key markets, growth will continue to be robust. Whether your needs require a handful of fibers or hundreds of fibers, Bandwidth IG is prepared to serve you through our 100% buried, high-count fiber optic network.

## Our Offerings

### REACH

On-net presence in nearly all strategic data centers in our markets. Additional conduits are available to provide rapid future growth capacity at a low incremental cost.

### DIVERSITY

Our network is designed to minimize overlap with other network operators. Multiple unique routes ensure the highest levels of security and reliability.

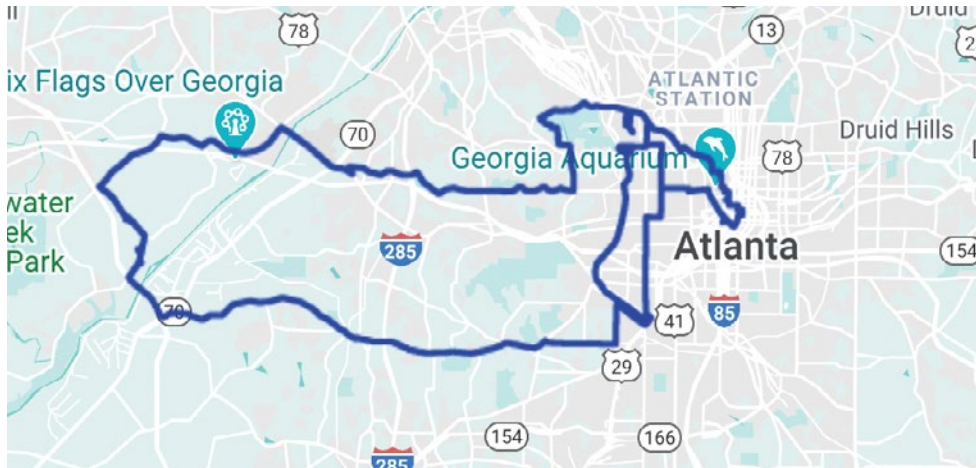

### SCALABILITY

Our newly constructed network means minimal degradation. It is 100% underground and includes multiple conduits that are populated with state-of-the-art fiber cables.

### CUSTOMIZATION

We partner with you to deliver tailored solutions that meet your needs. Our commercial terms disrupt traditional buying behavior.

## Greater Atlanta Network

**Route Miles:** 43

**Fiber Miles:** 75,000

**Reach:** 16 major data centers representing over 380 MW of IT load

## On-Net to Most Major Data Centers
