

Greater Portland

The Greater Portland, Oregon, area is one of the fastest growing data center markets in the Pacific Northwest. With the state's tax incentives for businesses, paired with its proximity to seven trans-Pacific subsea cables and low-cost renewable power sources, the Greater Portland area is poised to experience large-scale data center development. The anticipated growth will further contribute to the rising demand for bandwidth throughout the Greater Portland area. The opportunities for enterprises to grow and connect to their customers are vast, and so are the opportunities for the development of dark fiber to power that need.

Bandwidth IG

Bandwidth IG provides mission critical data centers, hyperscalers and enterprises with high capacity, dark fiber throughout the San Francisco Bay Area, Greater Atlanta and Greater Portland. The company's new network is intentionally placed to ensure minimal overlap with other networks. The high-density cables allow Bandwidth IG to deliver diverse, low-latency, high-count fiber networks at a competitive value. Bandwidth IG helps enterprises leverage the power of future digital advancements by delivering strategic dark fiber networks with the guidance of a professional, committed team of industry experts. The company maintains relentless focus on building and operating go-to dark fiber networks to support technological growth in all markets in which it operates. With more major data center operators constructing new facilities in these key markets, growth will continue to be robust. Whether your needs require a handful of fibers or hundreds of fibers, Bandwidth IG is prepared to serve you through our 100% buried, high-count fiber optic network.

Our Offerings

REACH

On-net presence in nearly all strategic data centers in our markets. Additional conduits are available to provide rapid future growth capacity at a low incremental cost.

DIVERSITY

Our network is designed to minimize overlap with other network operators. Multiple unique routes ensure the highest levels of security and reliability.

SCALABILITY

Our newly constructed network means minimal degradation. It is 100% underground and includes multiple conduits that are populated with state-of-the-art fiber cables.

CUSTOMIZATION

We partner with you to deliver tailored solutions that meet your needs. Our commercial terms disrupt traditional buying behavior.

Greater Portland Network

Route Miles: 12

Fiber Miles: 21,000

Reach: 14+ data centers
representing over
350 MW of IT load

On-Net to Most Major Data Centers
